

The **Ticket Manager™** was specifically designed with “**underground damage prevention**” in mind. It is a simple and powerful web-based tool for tracking, managing and geospatially referencing your dig ticket information. It saves time and improves efficiencies by allowing you to do your own ticket research and analysis while managing the entire ticket locate process visually using a map.

The **Ticket Manager™** provides companies with tools for:

- Automatic Email Notification
- Advanced mapping capabilities: view tickets in relation to assets, buffers, etc. on a map
- Query & navigate to tickets via interactive map
- Query tickets by ticket number, contractor, status, date, locator, etc.
- Search for tickets based on location & one call service area
- Advanced sorting of search results
- View ticket details from search results
- Manage complete ticket lifecycle
- Screen tickets
- Positive Response notification
- Ticket research & reporting
- View complete ticket history
- Ticket bulk operations

CeleritasWorks™, LLC is an enterprise-class GIS development company headquartered in Kansas City. In addition to core IT consulting services, Celeritas offers patented and copyrighted web-based solutions aimed specifically at the Underground Damage Prevention marketplace.
